THE POWER OF ICU

“INTENSIVE CARE UNIT”

The Defeat of Student Apathy

Apathetic students drain the life and energy from teachers and administrators. Educators are being told to have “Higher Expectations” from an increasing number of students who have an energy shortage and just “don’t care” to succeed in our schools. Prior to ICU, success strategies for encouragement, rewards, and motivational speeches were ineffective for apathetic students. The **“Power of ICU”** will defeat apathy in our schools.

Danny Hill and Dr. Jayson Nave have presented to over 20,000 educators at the elementary, middle, and high school levels in the past three years. They have received great feedback from successful ICU schools in Alabama, Arkansas, Minnesota, Missouri, New Mexico, Ohio, South Carolina, South Dakota, Texas, and Tennessee.

Watch Danny, Jayson, and a team of ICU Practitioners from around the country layout a blueprint to DEFEAT THE MONSTER...STUDENT APATHY.

The Power of ICU co-author, Dr. Jayson Nave said, “The Power of ICU Conference offers educators a unique opportunity to learn what ICU implementations are working in other schools, new methods and tactics for building their school cultures, and an overall positive collaboration experience with a focus on defeating student apathy.”

“Power of ICU fulfills a long-awaited solution for campus principals in need of a structured framework to eliminate apathy from their campus culture. Many programs and conferences offer great ideas for schools, but Power of ICU provides detailed implementation steps for the entire learning community through shared responsibility of all stakeholders.”

Dr. Darin Jolly, Mabank Junior High School, Mabank, Texas

THE POWER OF ICU Summer Conference

The Defeat of Student Apathy

WHAT IS THE PURPOSE OF THE ICU CONFERENCE?

Schools already using ICU will get a “booster shot” of ideas for next school year. We will have mini sessions throughout the day led by administrators and teachers from our successful ICU schools across the country to promote implementation and survival strategies for success. New teachers or new schools to ICU can attend the morning Power of ICU presentation with Danny and then spend the rest of the day with the rest of their team.

HELP FOR MATH TEACHERS USING ICU

Math is challenging for so many students - how can you get every assignment completed and still follow your pacing guide? We will give your math teachers several practical ideas for next year.

SCHOOLS INTERESTED IN IMPLEMENTING ICU

Core teams from schools interested in starting ICU will hear the Power of ICU presentation from Danny in the morning and then attend mini sessions of their choice in the afternoon.

TARGETED TOPICS FOR THE DAY

Grades – Common sense ideas on how to keep moving forward for grades to reflect learning.

Extra Time - Successful schools are tenacious about effectively using every minute of every school day for academics. Before, during, and after school practical ideas will be shared.

Extra Help – Extra time can become like the old “Study Hall” if you are not careful. Targeted and required extra help ideas will be shared.

ICU List – Schools using ICU will be able to see the way other ICU schools keep their list. Improving the way you keep your list and how you use your list will inject new energy into your teachers for next year. What about the most apathetic students, any new ideas? – Yes, absolutely! We have several successful ideas generated from ICU schools across the country within the past year that you will love because they work.

Other topics related to Lifeguards, Advisory, Extra Practice, Re-Study/Re-Take, and successful teacher practices related to how to handle and organize Incomplete assignments.

***Along with your attendance you will receive the book *The Power of ICU*
“The Defeat of Student Apathy”***
